

KANNIKA BANGLES

Deep SEO Audit & Ranking Implementation Plan

Exact page targeting, metadata, technical fixes and Antigravity instructions

Goal

Increase qualified organic search visibility for Kannika Bangles, especially Bangalore-local commercial searches, bridal jewellery searches, product discovery and high-intent bangle sizing queries.

Audit date: 30 September 2026

www.kannikabangles.com

1. Antigravity: Read This Before Changing the Site

PRIMARY INSTRUCTION TO ANTIGRAVITY

Implement this audit as an SEO refactor, not as a redesign. Preserve the current visual brand unless a UX bug requires a change. First inspect the existing stack and routing. Then: (1) create a single source of truth for metadata, NAP, opening hours and delivery promises; (2) apply the page-by-page keyword map below; (3) add server-rendered unique title, description, canonical and Open Graph metadata to every indexable page; (4) fix crawl/indexation, product URLs, schema, category taxonomy and duplicate content; (5) do not invent reviews, material claims, prices, business hours, history, certifications or product specifications; pull factual values from the database/business owner; (6) do not create large numbers of near-duplicate location/keyword pages; (7) add automated tests so SEO regressions are caught before deploy.

Non-negotiable implementation rules

- Do NOT add <meta name="keywords">. Google ignores the meta-keywords tag. The 'keywords' in this report are target search terms to use naturally in titles, H1s, copy, internal links and image alt text.
- One primary search intent per indexable URL. Avoid two Kannika pages competing for the same head keyword.
- All indexable URLs must return 200, have a self-referencing canonical, unique title, unique meta description, one clear H1, crawlable internal links and inclusion in the XML sitemap.
- Redirect removed/renamed URLs with 301 redirects. Update internal links to the final URL; do not rely on chains.
- Noindex cart, checkout, account/login, internal search results and low-value faceted/filter URLs. Do not place noindexed URLs in the sitemap.
- If the stack is Next.js App Router, use static metadata/generateMetadata server-side. If not, implement the equivalent server-rendered head tags. Avoid client-only metadata injection.
- Use the exact same business name, address, phone, opening hours and delivery wording everywhere on the site and in structured data.

2. Executive SEO Diagnosis

Current state: The site has a stronger-than-average base: dedicated category pages, local landing pages, internal linking, long-form content, product pages and a useful bangle-size calculator. The limiting factor is now architecture and trust, not the amount of SEO copy.

Highest-impact problems found

Severity	Finding	What to do
CRITICAL	Keyword cannibalization	The homepage, /shop and /bridal-jewellery-bangalore all heavily target bridal jewellery in Bangalore. Give each URL a distinct job.
CRITICAL	Bangle-size duplication	The interactive calculator competes with two blog posts covering the same size-chart/measurement intent. Consolidate into one canonical resource and 301 the two weaker URLs.
HIGH	Local business inconsistency	Different pages display conflicting showroom hours and wording for the address/landmark. Local SEO requires one consistent NAP/hours source.
HIGH	Delivery promise inconsistency	The site simultaneously states 24-48 hour Bangalore delivery, 10-day delivery and in places same-day dispatch. Standardize by geography and product availability.

Severity	Finding	What to do
HIGH	Category UX/data bug	Category pages visibly show 'Showing 0' while products are present. Product totals also vary between pages.
HIGH	Product URL architecture	Numeric URLs such as /product/36 are less descriptive than stable product slugs. Migrate with 301s and consistent canonicals.
HIGH	Thin product differentiation	Observed product copy is largely one-line/generic, while many products display the same 5.0 / 18 review pattern. Product pages need real unique attributes and genuine review data.
HIGH	Taxonomy mismatch	The Necklaces category contains Tikka and Passa items. Create/use a Head Jewellery taxonomy and keep categories semantically clean.
HIGH	Templated landing-page footprint	Several local/bridal pages share a very similar structure and language. Keep pages only when their inventory and user intent are genuinely distinct.
MEDIUM	Repeated lead components	The bridal and temple landing pages show duplicate enquiry sections in crawlable content. Render the form once.
MEDIUM	Overstated/unsourced claims	Claims about hypoallergenic materials, years of durability, ratings, 'genuine' stones, savings and product equivalence should be supported or softened.
MEDIUM	Authorship/E-E-A-T gaps	Blog articles need visible author/reviewer credentials, original expertise, dates and references where claims are factual.
MEDIUM	Robots/sitemap/schema require validation	The public crawl confirmed many indexable pages, but robots.txt/sitemap.xml and raw JSON-LD could not be reliably verified in this audit environment. Validate them in production and Search Console.

Ranking strategy

Do not chase 'more pages' first. Consolidate overlapping URLs, strengthen genuine product/store evidence, improve crawlability and structured data, then build authority. More templated landing pages could dilute quality rather than improve rankings.

3. Keyword Ownership Strategy

Core principle: Each high-value query family should have one obvious best Kannika URL. Secondary pages should support it through contextual internal links rather than compete with it.

Keyword family	Owner URL	Role
jewellery / artificial jewellery shop in Bangalore	/	Main local-commercial authority page
bridal jewellery in Bangalore	/bridal-jewellery-bangalore	Main bridal local landing page
shop artificial / bridal jewellery online	/shop	Catalogue hub
bridal bangles Bangalore	/bangles	Category
bridal necklaces / choker sets Bangalore	/necklaces	Category
bridal jhumkas / earrings Bangalore	/earrings	Category
pendant sets Bangalore	/pendant-sets	Category
temple jewellery Bangalore	/temple-jewellery-bangalore	Style/local landing page
Muhurtham jewellery Bangalore	/muhurtham-jewellery-bangalore	Ceremony/local landing page
Kundan / Jadau jewellery Bangalore	/kundan-and-jadau-jewellery-bangalore	Style/local landing page
antique matte jewellery Bangalore	/antique-matte-finish-jewellery-bangalore	Finish/style landing page
South Indian bridal jewellery set	/south-indian-bridal-jewellery-set	Complete-set landing page
Indian bangle size chart / calculator	/bangle-size-chart-calculator	National informational asset
wedding return gift bangles Bangalore	/wedding-return-gifts-bangles-bangalore	Bulk/return-gift landing page

4. Exact SEO Metadata & Keyword Map - Core Pages

Important: The keyword fields below are content targets, not a meta-keywords tag. Titles/descriptions are click-oriented recommendations; Google may rewrite snippets based on the query.

URL	Primary target	Secondary cluster	Recommended <title>	Recommended meta description	H1 / action
/	artificial jewellery shop in Bangalore	jewellery shop in Bangalore; imitation jewellery Bangalore; jewellery shop Malleshwaram; 1 gram gold jewellery Bangalore	Artificial Jewellery Shop in Bangalore Kannika Bangles (56 chars)	Shop bridal bangles, temple jewellery, Kundan sets and 1 gram gold jewellery at Kannika Bangles, Malleshwaram. Visit our Bangalore showroom or shop online. (155 chars)	H1: Artificial & Bridal Jewellery Shop in Bangalore Action: Make this the main local-commercial page. Remove repeated attempts to make it rank primarily for 'bridal jewellery Bangalore'; link prominently to the dedicated bridal page.
/shop	artificial jewellery online	bridal jewellery online; imitation jewellery online; shop bridal jewellery; 1 gram gold jewellery online	Shop Artificial & Bridal Jewellery Online Kannika Bangles (59 chars)	Browse bangles, necklaces, pendant sets and earrings with premium micro-gold finishes. Shop online or inspect pieces on live WhatsApp video from Bangalore. (155 chars)	H1: Shop Artificial & Bridal Jewellery Online Action: De-emphasize 'bridal jewellery Bangalore' to stop competing with /bridal-jewellery-bangalore. Keep this as the complete catalogue hub.
/bangles	bridal bangles Bangalore	bridal kadas Bangalore; artificial bangles Bangalore; Kundan bangles; temple bangles; gold plated bangles Bangalore	Bridal Bangles & Kadas in Bangalore Kannika Bangles (53 chars)	Explore bridal bangles, Kundan kadas, temple bangles and micro-gold plated wedding stacks in Bangalore. Sizes 2.2-2.12 with showroom and WhatsApp styling. (154 chars)	H1: Bridal Bangles & Traditional Kadas in Bangalore Action: Fix the visible 'Showing 0' bug. Add intro copy above products, real size availability, ProductList/ItemList where appropriate, and internal links to the size calculator.
/necklaces	bridal necklaces Bangalore	bridal choker sets Bangalore; temple haram Bangalore; Kundan necklace Bangalore; bridal necklace sets	Bridal Necklaces & Choker Sets Bangalore Kannika Bangles (58 chars)	Shop bridal chokers, temple harams and Kundan necklace sets in Bangalore. Explore wedding-ready designs with live WhatsApp inspection and Malleshwaram pickup. (158 chars)	H1: Bridal Necklaces, Chokers & Harams in Bangalore Action: Remove Maang Tikka/Passa products from this taxonomy. Those products dilute topical relevance and should live in a Head Jewellery category.
/pendant-sets	pendant sets Bangalore	gold plated pendant sets Bangalore; bridal pendant sets; 1 gram gold pendant set; Kundan pendant set	Pendant Sets in Bangalore Bridal & 1 Gram Gold Kannika (58 chars)	Browse handcrafted pendant sets in Bangalore, including Kundan, temple, AD and 1 gram gold styles with matching earrings and WhatsApp product inspection. (153 chars)	H1: Handcrafted Pendant Sets in Bangalore Action: Fix 'Showing 0' and the inconsistent total product count. Keep page focused on pendant/locket sets rather than generic bridal jewellery.
/earrings	bridal jhumkas Bangalore	bridal earrings Bangalore; temple jhumkas Bangalore; Kundan earrings; antique jhumkas; wedding earrings Bangalore	Bridal Jhumkas & Earrings in Bangalore Kannika Bangles (56 chars)	Shop bridal jhumkas, temple earrings, studs and statement wedding earrings in Bangalore with premium micro-gold finishes and live WhatsApp inspection. (150 chars)	H1: Bridal Jhumkas & Earrings in Bangalore Action: Use product-specific specs such as weight, post type and dimensions. Avoid unsupported blanket medical/safety claims unless documented.
/bridal-jewellery-bangalore	bridal jewellery in Bangalore	bridal jewellery Bangalore; bridal jewellery shop Bangalore; wedding jewellery Bangalore; bridal imitation jewellery Bangalore	Bridal Jewellery in Bangalore Wedding Sets Kannika Bangles (62 chars)	Explore bridal jewellery in Bangalore: temple harams, Kundan chokers, bridal bangles, jhumkas and complete wedding sets. Visit Malleshwaram or book a video styling session. (172 chars)	H1: Bridal Jewellery in Bangalore Action: This should be the single strongest page for the head term. Remove duplicate enquiry form rendering and add real bridal photos, testimonials and complete-set case studies.
/temple-jewellery-bangalore	temple jewellery Bangalore	antique temple jewellery Bangalore; Nakshi jewellery Bangalore; Kemp jewellery Bangalore; temple haram Bangalore	Temple Jewellery in Bangalore Nakshi & Kemp Sets Kannika (60 chars)	Discover temple jewellery in Bangalore with Nakshi Lakshmi harams, Kemp kadas, temple jhumkas and antique matte finishes. Visit our Malleshwaram showroom. (154 chars)	H1: Temple Jewellery in Bangalore Action: Keep distinct from Muhurtham page by emphasizing motifs, Nakshi craft, Kemp/temple styles and actual temple-jewellery inventory. Remove duplicate lead form rendering.

URL	Primary target	Secondary cluster	Recommended <title>	Recommended meta description	H1 / action
/muhurtham-jewellery-bangalore	Muhurtham jewellery Bangalore	South Indian wedding jewellery Bangalore; Muhurtham jewellery set; Kalyana jewellery Bangalore; bridal jewellery for Kanjivaram	Muhurtham Jewellery in Bangalore Bridal Sets Kannika (56 chars)	Shop Muhurtham jewellery in Bangalore for Kanjivaram weddings: Lakshmi harams, Kemp chokers, bridal bangles and jhumkas with showroom styling in Malleshwaram. (158 chars)	H1: Muhurtham Jewellery in Bangalore Action: Keep this ceremony-intent page distinct from Temple Jewellery. Use real 'complete Muhurtham look' bundles and ceremony-specific photos.
/kundan-and-jadau-jewellery-bangalore	Kundan jewellery Bangalore	Jadau jewellery Bangalore; Kundan bridal jewellery Bangalore; Kundan choker Bangalore; Jadau bangles	Kundan & Jadau Jewellery in Bangalore Kannika Bangles (55 chars)	Explore Kundan and Jadau jewellery in Bangalore, including bridal chokers, bangles, jhumkas and pendant sets with live WhatsApp inspection and showroom pickup. (159 chars)	H1: Kundan & Jadau Jewellery in Bangalore Action: Replace templated copy with actual construction details, close-up images and differentiators for your inventory. Keep claims verifiable.
/antique-matte-finish-jewellery-bangalore	antique jewellery Bangalore	antique matte jewellery Bangalore; antique gold jewellery Bangalore; matte finish jewellery Bangalore; Nakshi antique jewellery	Antique Matte Jewellery in Bangalore Kannika Bangles (54 chars)	Shop antique matte jewellery in Bangalore with Nakshi harams, temple kadas, jhumkas and bridal sets in rich heritage gold finishes. Malleshwaram showroom. (154 chars)	H1: Antique Matte Jewellery in Bangalore Action: Use real finish close-ups and explain finish/care. Avoid 'indistinguishable from solid 22K gold' unless substantiated and appropriate.
/south-indian-bridal-jewellery-set	South Indian bridal jewellery set	South Indian bridal jewellery online; complete bridal jewellery set; Kalyana jewellery set; bridal jewellery set Bangalore	South Indian Bridal Jewellery Sets Bangalore Kannika (56 chars)	Explore complete South Indian bridal jewellery sets with choker, haram, earrings, bangles and head jewellery. Get a coordinated Kalyana look from Kannika Bangalore. (164 chars)	H1: South Indian Bridal Jewellery Sets Action: Turn this into a true bundle/solution page: show what is included, bundle SKUs, selectable styles, total pricing and real set photography.
/temple-vaddanam-kamarbandh	Vaddanam Bangalore	temple Vaddanam Bangalore; bridal Kamarbandh Bangalore; South Indian waist belt; temple waist belt	Temple Vaddanam & Kamarbandh in Bangalore Kannika (51 chars)	Shop temple Vaddanam and bridal Kamarbandh in Bangalore with Lakshmi, peacock and Nakshi designs, adjustable waist fit and Malleshwaram showroom trials. (152 chars)	H1: Temple Vaddanam & Bridal Kamarbandh in Bangalore Action: Only keep measurements that are true for each product. Add product-specific waist range and weight rather than one blanket figure.
/bridal-matha-patti-maang-tikka	Matha Patti Bangalore	Maang Tikka Bangalore; bridal Matha Patti Bangalore; Nethi Chutti Bangalore; bridal head jewellery	Bridal Matha Patti & Maang Tikka Bangalore Kannika (52 chars)	Explore bridal Matha Patti, Maang Tikka and South Indian Nethi Chutti designs in Bangalore. Match your head jewellery with chokers, sarees and bridal sets. (155 chars)	H1: Bridal Matha Patti & Maang Tikka in Bangalore Action: Create a proper Head Jewellery category and route current tikka/passa products here instead of /necklaces.
/antique-vanki-baajuband	Vanki Bangalore	bridal Vanki Bangalore; Baajuband Bangalore; South Indian armlet; antique armlet Bangalore	Bridal Vanki & Baajuband in Bangalore Kannika Bangles (55 chars)	Shop bridal Vanki and Baajuband in Bangalore with antique temple, peacock and Kemp styles. Get fit guidance and in-store trials at Malleshwaram. (144 chars)	H1: Bridal Vanki & Baajuband in Bangalore Action: Current featured products are mostly kadas/earrings, not Vanki. Add real Vanki inventory or this page will not satisfy its search intent.
/wedding-glass-bangle-stacks	bridal glass bangles Bangalore	wedding glass bangle sets; green bridal bangles; red bridal bangles; bangle stack Bangalore	Bridal Glass Bangle Sets in Bangalore Kannika Bangles (55 chars)	Create custom bridal glass bangle stacks in Bangalore with green, red and antique gold kadas. Match your Kanjivaram saree and exact bangle size. (144 chars)	H1: Bridal Glass Bangle Sets & Wedding Stacks Action: Add real purchasable stack products, prices and size variants. Currently the page is more informational than transactional.
/wedding-return-gifts-bangles-bangalore	wedding return gifts Bangalore	return gift bangles Bangalore; wedding return gifts bangles; thamboolam return gifts; bulk bangles Bangalore	Wedding Return Gift Bangles Bangalore Wholesale Kannika (59 chars)	Order wedding return gift bangles in Bangalore with bulk packs, size assortments and ready-to-gift packaging. Request wholesale pricing and venue delivery. (155 chars)	H1: Wedding Return Gift Bangles in Bangalore Action: Verify every price, minimum order and 'factory/wholesale' claim. Add real sample photos, MOQ, lead time, GST/invoice details and delivery terms.

URL	Primary target	Secondary cluster	Recommended <title>	Recommended meta description	H1 / action
/bangle-size-chart-calculator	bangle size chart	Indian bangle size chart; bangle size calculator; bangle size in cm; bangle size in mm; how to measure bangle size; bangle size 2.4 2.6 2.8	Indian Bangle Size Chart & Calculator 2.2 to 2.12 Kannika (61 chars)	Find your Indian bangle size with a 2.2-2.12 chart, mm/cm/inch conversions and interactive calculator. Measure an existing bangle or your hand at home. (151 chars)	H1: Indian Bangle Size Chart & Calculator Action: Make this the canonical sizing resource. 301 redirect both overlapping bangle-size blog posts here and expand it with images, FAQs and size-specific anchors.
/blog	bridal jewellery guides	bangle sizing guide; bridal jewellery styling; temple jewellery guide; Bangalore wedding jewellery tips	Bridal Jewellery Guides, Sizing & Styling Kannika Bangles (59 chars)	Read Kannika Bangles guides on bridal jewellery styling, bangle sizing, temple jewellery, Kanjivaram matching, 1 gram gold care and Bangalore wedding shopping. (159 chars)	H1: Bridal Jewellery Guides & Styling Advice Action: Add visible author/reviewer profiles, topic clusters, breadcrumbs and 'last reviewed' dates based on real updates.
/about	Kannika Bangles Malleshwaram	Kannika Bangles Bangalore; jewellery shop Malleshwaram; about Kannika Bangles	About Kannika Bangles Jewellery Store in Malleshwaram (55 chars)	Learn the story of Kannika Bangles in Malleshwaram, Bangalore, our bridal jewellery focus, showroom experience, craftsmanship standards and customer service. (157 chars)	H1: About Kannika Bangles Action: Resolve address/hours inconsistencies. Add founder/owner story, real store/team photos, timeline and links to verified profiles/reviews.
/contact	Kannika Bangles contact	Kannika Bangles Malleshwaram address; jewellery shop Malleshwaram; Kannika Bangles phone	Contact Kannika Bangles Malleshwaram Jewellery Store (54 chars)	Contact Kannika Bangles in Malleshwaram, Bengaluru for bridal jewellery, bangle sizing, WhatsApp video shopping, showroom directions and opening hours. (151 chars)	H1: Contact Kannika Bangles - Malleshwaram Action: Use one canonical NAP and one authoritative set of opening hours. Embed map, route link, WhatsApp, phone and parking/landmark details.

5. Blog URL Actions & Metadata

URL	Primary target	Recommended title	Recommended meta description	Action
/blog/best-artificial-jewellery-shops-in-commercial-street-bangalore	artificial jewellery Commercial Street Bangalore	Artificial Jewellery in Commercial Street Bangalore: Buying Guide	Shopping for artificial jewellery around Commercial Street Bangalore? Compare styles, pricing, quality checks and nearby alternatives before buying bridal jewellery.	REWRITE. Be transparent that Kannika is in Malleshwaram, not Commercial Street. Remove unsupported competitor markup/pricing claims unless sourced.
/blog/how-to-match-bridal-jewellery-with-kanjivaram-silk-sarees	jewellery for Kanjivaram saree	How to Match Jewellery with Kanjivaram Sarees Bridal Guide	Learn how to match temple jewellery, chokers, harams, bangles and earrings with Kanjivaram saree colors, zari tone, blouse neckline and wedding function.	KEEP + IMPROVE with real outfit examples, original photos and stylist byline.
/blog/temple-jewellery-designs-and-meanings-goddess-lakshmi-peacock-nakshi	temple jewellery designs and meanings	Temple Jewellery Designs & Meanings Lakshmi, Peacock, Nakshi	Understand popular South Indian temple jewellery motifs including Lakshmi, peacock, mango and Nakshi designs, plus how they are used in bridal styling.	KEEP but fact-check historical/cultural claims and cite reliable references. Add expert review.
/blog/bridal-jewellery-budget-calculator-bangalore-weddings	bridal jewellery budget Bangalore	Bridal Jewellery Budget for Bangalore Weddings 2026 Guide	Plan a Bangalore bridal jewellery budget by ceremony and compare real-gold, rental and micro-gold options. Use realistic ranges and a practical shopping checklist.	REWRITE all gold-price and savings claims with dated sources. Avoid exaggeration such as 'identical visual luxury'. Add calculator functionality if possible.

URL	Primary target	Recommended title	Recommended meta description	Action
/blog/wedding-jewellery-rental-vs-buying-bangalore	bridal jewellery rental vs buying Bangalore	Bridal Jewellery Rental vs Buying in Bangalore Cost Guide	Compare renting and buying bridal jewellery in Bangalore by total cost, deposit, sizing, hygiene, flexibility and reuse across wedding functions.	KEEP but make comparison neutral, sourced and realistic; remove fear-based or absolute claims.
/blog/bangle-size-guide-and-wrist-measurement	bangle size guide	301 REDIRECT TO /bangle-size-chart-calculator	Do not keep as a separate competing sizing article.	301 REDIRECT. Merge unique content into the calculator page first.
/blog/indian-bangle-size-chart-how-to-measure-wrist-size	Indian bangle size chart	301 REDIRECT TO /bangle-size-chart-calculator	Do not keep as a separate competing sizing article.	301 REDIRECT. This currently competes with the strongest sizing resource.
/blog/1-gram-gold-jewellery-price-guide-and-maintenance-tips	1 gram gold jewellery price	1 Gram Gold Jewellery Price & Care Guide Kannika Bangles	Learn how 1 gram and micro-gold plated jewellery is priced, what affects durability, how to care for it and what to check before buying bridal pieces.	KEEP + FACT-CHECK. Explain terminology accurately and avoid implying a plating thickness/weight unless known for the actual products.
/blog/how-to-choose-bridal-jewellery-for-south-indian-weddings	South Indian bridal jewellery guide	South Indian Bridal Jewellery Guide What to Wear & How to Layer	Plan a South Indian bridal jewellery look with choker, haram, jhumkas, bangles, Vanki, Vaddanam and head jewellery matched to each wedding function.	KEEP + EXPAND with real bride looks, checklists and internal links to commercial pages.

6. Required On-Page Changes

Homepage

- Change the visible H1 from the branding-only 'Timeless Elegance, Forever Radiant' to a descriptive H1 such as 'Artificial & Bridal Jewellery Shop in Bangalore'. Keep the brand line as a styled tagline, not the only H1.
- Trim repetitive Bangalore/bridal paragraphs. Keep the strongest proof: Malleshwaram showroom, product categories, live inspection, sizing, real reviews and real store/product imagery.
- Link to /bridal-jewellery-bangalore with descriptive anchor text such as 'bridal jewellery in Bangalore' instead of making the homepage repeat the same intent.
- Standardize the actual showroom hours and delivery wording before deploying any SEO changes.

Category pages

- Fix 'Showing 0' while products are visible. The count must come from the same product query used to render the list.
- Keep a short, useful intro above the product grid (80-150 words) and deeper buying guidance below it. Do not bury products under huge SEO copy.
- Use descriptive product links and breadcrumbs: Home > Bangles > Product.
- Noindex/filter-canonical faceted URLs if sorting/filter parameters create duplicate pages. The canonical category URL should remain clean.

Landing pages

- Remove duplicated enquiry form components; render once per page.
- Replace repeated 'handcrafted artisanal masterpieces ready for 24-48 hr...' boilerplate with page-specific evidence and real inventory details.
- Add real product grids relevant to the exact page. A Vanki page should contain actual Vanki products, not mainly kadas and earrings.
- Use real photos/case studies, not just AI-enhanced showcase images. The current transparency disclosure is positive; preserve it and make unedited imagery easier to access.

Product pages

- Move from numeric URLs such as /product/36 to descriptive stable URLs such as /products/classic-temple-jhumka. 301 old URLs and update internal links, canonicals and sitemap entries.
- Use unique product copy from database facts: SKU, material, finish, stones, size, dimensions, weight, closure, pieces included, care, stock, dispatch time and styling notes.
- Resolve the same-page delivery contradiction (e.g. Bangalore 24-48 hours vs generic 'Delivery in 10 Days'). Make the delivery module geography-aware and consistent.
- Only show review counts/ratings that are genuine. The audit observed the same 5.0 / 18 pattern repeatedly across related products; remove placeholder review data if that is what it is.
- Primary product image should be a real photo. Add front, side, back/closure, scale/worn image and short video where possible.

7. Product SEO: URL, Title & Description System

Recommended product URL pattern

Use /products/{descriptive-product-slug}. Keep slugs stable once indexed. Example: /products/classic-temple-jhumka, not /product/36.

Dynamic metadata template

- Title: {Product Name} | {Primary Style/Category} Bangalore | Kannika. Keep it descriptive; shorten when it exceeds typical SERP width.
- Meta description: '{Product Name} in {finish/material}, with {key stone/design feature}. {size/fit or included pieces}. Available from Kannika Bangles Bangalore with live WhatsApp inspection.' Pull only real attributes.
- H1: exact product name.
- Canonical: the final descriptive product URL.
- Open Graph image: the primary real product image.
- Do not programmatically repeat the exact same generic sentence across every product.

8. Current Product Catalogue: Recommended Slugs & Title Targets

These are generated from products observed in the live catalogue. Antigravity must confirm names, categories and DB records before migrating URLs. Tikka/Passa items should move out of Necklaces into Head Jewellery.

Current grouping	Product	Target category	Recommended URL	Primary keyword target	Recommended title
Bangles	Antique Gold Kada	bangles	/products/antique-gold-kada	antique gold kada Bangalore	Antique Gold Kada Bridal Jewellery Bangalore Kannika

9. Technical SEO Implementation

Canonicals

Add one self-referencing canonical to every indexable page. Product/category canonical must match internal links and the sitemap. Canonicalize filter/sort variants to the clean category URL when they do not deserve standalone indexing.

XML sitemap

Generate a clean sitemap containing only canonical 200-status URLs you want indexed. Split into products, categories/landing pages and blog if useful. Update automatically on publish/unpublish. Submit in Google Search Console.

robots.txt

Ensure robots.txt is publicly reachable at /robots.txt and does not block CSS/JS needed for rendering. Reference the sitemap. Do not use robots.txt as the method for removing URLs from the index.

Index controls

Use noindex for cart, checkout, login/account, internal search results, empty categories and low-value filter/sort parameter pages. Remove noindexed URLs from the sitemap.

Status codes

404 or 410 truly removed URLs; 301 permanently moved URLs; avoid soft-404s and redirect chains.

Crawlable links

Product and category navigation should use normal <a href> links. Do not depend on search boxes or JS click handlers for discovery.

Core Web Vitals

Target 75th-percentile LCP <= 2.5s, INP <= 200ms and CLS <= 0.1 on mobile and desktop. Measure with Search Console/CrUX and PageSpeed Insights.

Rendering

Critical product/category copy, links, metadata and schema should be present in rendered HTML and reliably visible to Google. Test key URLs with Search Console URL Inspection.

Pagination/facets

If product lists paginate, each page needs a unique crawlable URL and consistent internal links. Keep sort/filter combinations under control to avoid crawl traps.

Security/HTTPS

Keep one preferred https://www canonical host. Redirect http/non-www in one hop. Preserve current healthy host redirect behavior.

10. Structured Data / Schema

Page type	Schema	Implementation
Home / Contact	Organization + LocalBusiness	name, url, logo, address, telephone, openingHoursSpecification, sameAs, geo if verified, priceRange if accurate. Values must match visible content.

Page type	Schema	Implementation
Category / landing pages	BreadcrumbList	Use breadcrumbs that mirror the site hierarchy. Do not fake ratings on category/local pages.
Product pages	Product + Offer (merchant listing)	name, image, description, sku, brand, url, price, priceCurrency=INR, availability, itemCondition, shippingDetails, hasMerchantReturnPolicy where applicable.
Sized variants	ProductGroup / hasVariant	Use if size variants are true variants. Each variant should have a stable identifier/SKU and availability.
Blog posts	Article / BlogPosting	headline, image, datePublished, dateModified, author, reviewedBy where real, publisher.

- Validate representative pages with Google's Rich Results Test and Schema Markup Validator. Fix errors before rolling out sitewide.
- Create/maintain a Google Merchant Center product feed. Product structured data + Merchant Center gives Google a more complete understanding of catalogue price, availability and product identity.

11. Local SEO: Bangalore / Malleshwaram

Single source of truth required

The audit observed multiple opening-hour versions across the site. Decide the real hours once, store them centrally and render the same values on Home, About, Contact, landing pages, footer, JSON-LD and Google Business Profile.

- Standardize NAP: business name, postal address, phone number and showroom hours. Use a landmark as a landmark, not as a second conflicting address.
- Fully optimize the Google Business Profile: correct primary category, legitimate secondary categories, services/products, current hours, website URL with UTM tracking, appointment/WhatsApp links where allowed, and fresh real store/product photos.
- Ask real customers for Google reviews after purchase/showroom visits. Do not script identical reviews or gate reviews. Reply to reviews naturally and mention product/service details when appropriate.
- Build consistent citations on reputable local/business/wedding platforms. Correct duplicate or inconsistent profiles.
- Create local proof on-site: storefront photo, interior photo, staff/owner, parking/metro/landmark information, embedded map, directions from major nearby landmarks and genuine customer stories.
- Earn local links through Bangalore wedding photographers, makeup artists, saree boutiques, venues, wedding planners and bridal publications. Prefer editorial partnerships and useful resources over paid link packages.

12. Content Quality, Trust & E-E-A-T

- Replace generic luxury adjectives with first-hand product expertise: exact weight, dimensions, closure, plating/finish, size range, styling recommendations, care and use cases.
- Every blog should show a real author. For technical/cultural claims, add reviewer credentials and external references where appropriate.
- Show original photos and videos from the Malleshwaram showroom, real products and real brides/customers with permission. AI-enhanced imagery can remain secondary and clearly disclosed.
- Audit claims such as '100% hypoallergenic', 'nickel-free', 'lead-free', 'genuine Kemp rubies', 'luster lasts for years', 'lifetime polish care', '10K+ brides' and review counts. Keep only claims the business can substantiate.
- Avoid calling Kannika the 'best' or 'premier' as a factual claim unless it is clearly brand language or supported by an external award/ranking.
- Use Indian English spelling consistently: 'jewellery' sitewide, except where a user search phrase is naturally discussed.

13. Internal Linking Architecture

- Homepage -> key categories + Bridal + Temple + Bangle Size Calculator.
- Bridal landing page -> Bangles, Necklaces, Earrings, Matha Patti, Vaddanam, Vanki, complete South Indian set.
- Temple page -> Temple haram products, Temple kadas, Temple jhumkas, Muhurtham page, Kanjivaram styling guide.
- Bangles category -> Size calculator, glass bangle stacks, return gifts, top bangle products.
- Bangle size calculator -> all bangle/kada product pages and category; product pages -> calculator with 'Find your bangle size' anchor.
- Blog posts -> 2-4 relevant commercial pages in context. Commercial pages -> 1-2 genuinely useful guides, not a repetitive SEO link dump.
- Use BreadcrumbList and visible breadcrumbs. Avoid repeating the same large cross-link block on every landing page if it is not useful.

14. Image & Product Discovery SEO

- Rename new media descriptively before upload, e.g. antique-lakshmi-temple-haram-front.webp, not IMG_9322.webp.
- Write concise alt text that describes the actual image. Do not stuff 'Bangalore bridal jewellery' into every image.
- Use modern compressed formats (WebP/AVIF where compatible), responsive srcset/sizes and explicit width/height to reduce CLS.
- Do not lazy-load the above-the-fold/LCP hero image. Lazy-load below-the-fold product images.
- Use real product photography as the primary Product schema image and Merchant Center image. Keep AI/studio-enhanced imagery secondary and disclosed.
- Add short product videos and consider VideoObject schema only where the video is genuinely accessible and useful.

15. Organic Traffic Growth Plan - What to Publish Next

Do not publish dozens of similar pages. Build a smaller set of original resources that answer high-intent questions and earn links/search demand.

Content asset	Intent	Why it helps
1 Gram Gold Jewellery in Bangalore: Buying Guide	Commercial research	Support homepage/shop and 1-gram gold product discovery; include real plating/care facts and showroom examples.
Kemp Jewellery Guide: Designs, Stones, Styling & Care	Informational	Support Temple/Muhurtham clusters.
Temple Haram Length Guide for Kanjivaram Sarees	Informational / product-led	Use real product lengths and model photos; link to necklaces/temple page.
Bridal Jewellery Shopping Checklist for Bangalore Brides	Informational/local	Original checklist: saree swatches, sizes, function plan, budget, delivery lead time.
Bangle Size 2.4 vs 2.6 vs 2.8 - Which Fits?	Informational	Create as anchored sections within the main calculator first; only spin out pages if Search Console proves distinct demand and content can be unique.
How to Build a 24-Piece Bridal Bangle Stack	Informational/product-led	Real photos + exact products + sizes; support Bangles and glass stack pages.
AD Jewellery vs Kundan vs Temple Jewellery for Wedding Functions	Comparison	Help users choose by function and outfit; link to relevant categories.

Content asset	Intent	Why it helps
Kannika Bridal Lookbook: Real Malleshwaram Brides	Original first-party content	High trust, image search and conversion value; permission-based real customer stories.

16. Authority & Backlink Plan

- Create linkable assets (bangle calculator, sizing chart, bridal checklist, original lookbooks) before outreach.
- Pitch Bangalore wedding photographers/planners/saree boutiques a co-authored 'styling guide' or real-bride feature that naturally links back.
- Seek mentions from wedding publications, local Bangalore lifestyle media and vendor directories where Kannika is genuinely relevant.
- Sponsor/participate in real local bridal events only when the listing provides a legitimate business mention; avoid bulk paid backlink packages.
- Reclaim unlinked brand mentions and make sure citations point to the canonical <https://www.kannikabangles.com/> host.
- Build topical authority with fewer high-quality mentions rather than hundreds of low-quality directory links.

17. Search Console, Tracking & KPI Setup

- Verify Google Search Console and Bing Webmaster Tools. Submit the final sitemap after redirects/metadata deployment.
- Create a baseline export before launch: queries, pages, impressions, clicks, CTR, average position and indexed-page count for the previous 3 months.
- Track separately: local commercial pages, category pages, product pages, bangle calculator, blog.
- Set up GA4 events for WhatsApp click, phone click, directions click, form submit, add-to-cart, buy-now and checkout/purchase where applicable.
- Use UTM parameters on Google Business Profile website/appointment links so local traffic is measurable.
- Monitor cannibalization: if multiple URLs receive impressions for the same high-value query, decide the owner and strengthen/redirect/canonicalize accordingly.
- Do not judge the work only by ranking position. Track non-brand impressions, qualified organic clicks, local actions and revenue/leads.

18. Priority Roadmap

Days 1-7: fix foundations

- Confirm one business name/address/phone/hours/delivery policy source of truth.
- Fix 'Showing 0', product count inconsistencies and duplicated enquiry forms.
- Assign keyword ownership and deploy exact metadata/H1 changes from this report.
- Implement canonicals, sitemap/robots checks and noindex rules.
- 301 the two duplicate bangle-size blogs into the calculator after merging useful content.
- Audit all rating/review and product claim data for authenticity.

Days 8-30: ecommerce SEO

- Migrate numeric product URLs to descriptive slugs with 301s.
- Improve the top 20 products first with real descriptions, specs, images and Product/Offer schema.
- Fix category taxonomy; create Head Jewellery if inventory supports it.
- Implement ProductGroup variants for sizes where valid and Merchant Center feed.
- Add breadcrumbs + BreadcrumbList sitewide.
- Run Rich Results Test and Search Console URL inspection on representative page types.

Days 31-60: trust + local authority

- Upgrade About/Contact with real store/team imagery, verified history and directions.

- Optimize Google Business Profile and correct citations.
- Collect real customer reviews and add authentic product review content.
- Rewrite templated landing pages with real inventory, case studies and product-level proof.
- Improve real product photography and image SEO.

Days 61-90: growth

- Publish 2-4 original, expert-led guides from the content plan.
- Launch real-bride/lookbook content.
- Begin partnership/link outreach to Bangalore bridal ecosystem.
- Review Search Console query/page data and refine titles, internal links and content based on actual impressions/CTR.
- Expand only where Search Console demonstrates a distinct search intent.

19. Antigravity Acceptance Checklist Before Deploy

- ☐ Every indexable page has one unique title, one meta description, one canonical and one clear H1.
- ☐ No duplicate title/description among core commercial URLs.
- ☐ Homepage no longer competes as strongly with the dedicated Bridal page for the same exact intent.
- ☐ /shop is the catalogue hub, not another bridal-Bangalore landing page.
- ☐ Both duplicate bangle-size blog URLs 301 to /bangle-size-chart-calculator.
- ☐ No category displays 'Showing 0' when products exist; all counts come from the same data source.
- ☐ Tikka/Passa products are removed from Necklaces and assigned to the correct taxonomy.
- ☐ Numeric product URLs have 301s to descriptive product slugs; sitemap/internal links use only final URLs.
- ☐ All business hours/address/phone data is identical across visible pages and JSON-LD.
- ☐ Delivery wording is consistent by geography and product availability.
- ☐ Product ratings/reviews shown are genuine; no placeholder AggregateRating markup.
- ☐ Product schema validates with no critical errors on sample products.
- ☐ LocalBusiness/Organization and BreadcrumbList validate.
- ☐ Robots.txt and sitemap.xml return 200 and are publicly accessible.
- ☐ Cart/checkout/account/internal-search/low-value filter pages are noindex and excluded from sitemap.
- ☐ Core Web Vitals checked; optimize to LCP <=2.5s, INP <=200ms, CLS <=0.1 at p75.
- ☐ No claims are invented by the SEO implementation.

20. Audit Evidence, Sources & Limitations

Live Kannika pages reviewed included the homepage, shop/category pages, key bridal/local landing pages, bangle calculator, blog index/articles and a representative product page. Key observed examples:

- Homepage: <https://www.kannikabangles.com/>
- Shop: <https://www.kannikabangles.com/shop>
- Bangles: <https://www.kannikabangles.com/bangles>
- Necklaces: <https://www.kannikabangles.com/necklaces>
- Pendant Sets: <https://www.kannikabangles.com/pendant-sets>
- Earrings: <https://www.kannikabangles.com/earrings>
- Bridal Jewellery: <https://www.kannikabangles.com/bridal-jewellery-bangalore>
- Temple Jewellery: <https://www.kannikabangles.com/temple-jewellery-bangalore>
- Muhurtham: <https://www.kannikabangles.com/muhurtham-jewellery-bangalore>
- Kundan/Jadau: <https://www.kannikabangles.com/kundan-and-jadau-jewellery-bangalore>
- Antique Matte: <https://www.kannikabangles.com/antique-matte-finish-jewellery-bangalore>
- South Indian Bridal Set: <https://www.kannikabangles.com/south-indian-bridal-jewellery-set>
- Vaddanam: <https://www.kannikabangles.com/temple-vaddanam-kamarbandh>
- Matha Patti: <https://www.kannikabangles.com/bridal-matha-patti-maang-tikka>
- Vanki: <https://www.kannikabangles.com/antique-vanki-baajuband>
- Glass Bangle Stacks: <https://www.kannikabangles.com/wedding-glass-bangle-stacks>

- Core Web Vitals thresholds: <https://web.dev/articles/vitals>

Limitations

- This is a public-web audit, not a Google Search Console/GA4 audit. Actual query volume, clicks, conversion data, index coverage and backlinks should be added from your first-party tools.
- robots.txt, sitemap.xml and raw JSON-LD were not reliably retrievable in the audit interface, so the report treats those items as mandatory verification tasks rather than claiming they are missing.
- Search demand priorities are based on search intent, live SERP observation and site architecture, not paid keyword-volume data. Use Search Console (and optionally a dedicated keyword tool) to refine volume/difficulty after implementation.

Final recommendation

Kannika can grow organic traffic without producing hundreds of new SEO pages. The fastest path is to make the existing pages unmistakably distinct, technically clean and trustworthy; turn the bangle-size calculator into a national traffic asset; make product pages genuinely rich; strengthen local proof; and build real authority through reviews, original imagery and Bangalore wedding ecosystem links.
